# Aircraft Digital Company

Record Management

Our Records Management Services are designed to maximize asset value by ensuring the integrity, accessibility, and compliance of technical documentation throughout the asset lifecycle.

High-quality, well-maintained records are critical in preserving asset value, as they provide essential proof of compliance, maintenance, and operational history.

We cater to the specialized needs of Operators, MROs, CAMOs, and lessors, empowering seamless operations and informed decision-making.

Scanning and Digitalization of Technical Records

Our secure scanning and digitalization services convert physical records into fully accessible digital formats, providing long-term preservation and enhanced regulatory compliance. This digital transformation increases the efficiency of record retrieval and management, optimizing operational workflows. Our team is capable to perform this process seamlessly across the major software platforms available in the market, ensuring compatibility and adaptability to meet diverse operational needs.

Indexing of Technical Records

We provide systematic indexing for technical records, ensuring organized, easily searchable documentation that enhances accessibility and operational efficiency. Our indexing solutions support quick and accurate retrieval, aiding decision-making and simplifying compliance processes.

By enhancing the quality, structure, and accessibility of technical records, we help preserve and boost asset value across the aviation ecosystem.

Record Structure and Integrity Review

Our rigorous audits assess the structure and completeness of technical records, identifying any gaps in traceability. Whether supporting operators in ongoing operations or performing reviews for specific asset transitions, our team ensures that documentation is accurate and fully aligned with regulatory requirements critical for maintaining asset value.

Record Storage and Relocation

We offer secure, compliant storage and efficient relocation services for technical records, maintaining documentation accessibility and regulatory compliance during asset transitions or operational changes. Our solutions protect record integrity, supporting smooth transitions and high asset valuations.
